

META FRAC 30/50

UPG's **META FRAC 30/50** is a quality frac sand that is designed for standard well fracturing applications. **META FRAC** provides improved strength and conductivity at higher stress than other lower grade sands. **META FRAC 30/50** grade products are designed for closure stress up to 5,000 psi and temperatures up to at least 450°F.

UPG's **META FRAC** products provide excellent price / performance value, making it an economic alternative to low and medium density sands and a robust solution for use in wells where expensive ceramics or resins are out of budget and unnecessary. UPG's close proximity to your well head not only minimizes handling of our proppants but also reduces product cost so we can pass the saving on to you.

Product Specifications

Roundness.....	6 of 10
Sphericity.....	8 of 10
Acid Solubility.....	2.3%
Turbidity (NTU).....	9.9
Bulk Density.....	98.1 lb/ft ³
Median Particle Diameter.....	458
Specific Gravity.....	2.63 g/cc
Crush Resistance.....	5,000 PSI
K-Value.....	5K

Product Specifications are based upon API RP19C and ISO 13503-2 testing standards. UPG products professionally and independently tested by Stim-Labs & PropTesters.
